

Current BioData Ltd. is an innovative start-up company developing the **Targeted Proteins database (TPdb)**, a new set of resources for scientists and others involved in drug discovery. We are seeking an enthusiastic, flexible **Web Application Developer** to join our development team located in Geneva, Switzerland.

Your role:

- Work with a small team of developers to design and implement new product features for the TPdb platform
- Participate in various phases of the software development cycle including analysis, design, coding, reviews, and testing
- Deliver highly scalable, easy-to-use, high-quality, database-driven Web applications
- Contribute to the ongoing support, maintenance, and enhancement of the existing platform

Required profile:

- Degree in computer science or related
- Good understanding of object-oriented concepts and programming
- Experience in the development of Web applications is desirable
- Good knowledge of Java, JavaScript, and JSP
- Knowledge of Spring and Hibernate (or related technologies)
- Experience with one or more of the following technologies is a plus: AJAX, CSS, Flash, XML, jQuery, GWT, and Web services
- Familiarity with relational databases (Oracle) and SQL
- Strong analytical skills and the ability to work independently
- Good communication and interpersonal skills, works well as part of a fast-paced interdisciplinary product development team
- Good written and spoken English skills are required
- EU Passport, Swiss Work Permit, or Swiss Passport
